

please recycle

Our PaperBack Program is an eco-friendly effort involving you and us. We want you to return your unwanted out-of-date print jobs to us so we can have the paper recycled. • At places where we make regular deliveries, we'll even pick up the unwanted print jobs. For those who come to our facility, we'll have a convenient drop-off area where you can unload your out-of-date printed material. • To handle the loads of paper, we have invested in an industrial shredder and baling system. Once baled, the huge bundles will be shipped off for recycling. Our own waste paper amounts to 140 tons per month, so by recycling we are freeing up a lot of space at the city dump. With your help we can make a molehill out of a mountain of trash!
