1. Print World-class printing—without harming the world. Our PrintGreen Program offers recycled paper and eco-friendly inks. We buy quality paper from reliable companies that have a history of responsible business practices. Our sheet-fed presses use Liberty brand inks, which do not create volatile organic compounds like most inks. We are a zero emissions facility. We are committed to doing the best for our customers, our employees and the environment.

2. Recycle Our PaperBack Program is an eco-friendly effort involving you and us. We want you to return your unwanted out-of-date print jobs to us so we can have the paper recycled. At places where we make regular deliveries, we'll even pick up the unwanted print jobs. For those who come to our facility, we'll have a convenient drop-off area where you can unload your out-of-date printed material. To handle the loads of paper, we have invested in an industrial shredder and baling system. Once baled, the huge bundles will be shipped off for recycling. Our own waste paper amounts to 140 tons per month, so by recycling we are freeing up a lot of space at the city dump. With your help we can make a molehill out of a mountain of trash!

3. Repeat We understand that commercial printing makes huge demands on natural resources. Which is why we are committed to being as eco-friendly as we can possibly be.

We'd love to help, call us at 808-847-5310

Hagadone Printing is focused on becoming a sustainable organization with full employee participation, authority and responsibility by:

- Protecting the environment
- Using resources in a responsible way
- Reducing waste and recycle whenever possible
- Reducing risks to the environment and our employees
- Conserving energy
