

Good Chemistry

WE'VE SET THE GOLD STANDARD, AGAIN.

■ Over a decade ago, we set the standard for prepress with superior digital services. ■ Then, we raised the bar for quality with the most advanced sheetfed presses in the world. ■ Next, we blurred the line between web and sheetfed with the revolutionary, one-of-a-kind Goss M600 web press. ■ **NOW, WE'RE ADVANCING THE STATE OF MAILING TECHNOLOGY** with the most versatile high-speed addressing equipment available. Suddenly, your addressing options have expanded. Our new high-speed ink jetting equipment offers superior clarity, nearly unlimited choice of typefaces, expansive print areas, and the ability to print on a surprising variety of materials. Separate your marketing efforts from the others. ■ Let us help you explore your options. Call us for a consultation today.
